TRAVELLING CONFERENCE ON URBAN TRANSFORMATIONS IN INDUSTRIAL REGIONS

Travelling Conferences (TCs) are a format designed to promote and foster international exchange about specific current issues. In addition, they aim at enhancing cross-fertilization and synergies in research actions by strengthening excellence through global cooperation. With particular reference to this TC series, the thematic focus lies on questions of current urban transformation and comparable challenges faced by many metropolitan regions around the world, as well as on the ways in which policies, strategies, and blueprints for such transformations are exchanged globally. Accordingly, the format outlined for the TC combines a theoretical and conceptual approach along with an empirical section on selected current policies.

The thematically and structurally similar events will take place in Osaka, Ulsan, Dortmund and Cincinnati between October 2019 and September 2022. Representatives of KoMet, the University Alliance Ruhr and the Ruhrgebiet will be travelling to selected locations accompanied by delegates from the partner regions.
